Hi Joyce,

Good morning and thanks for the reply. Attached in this note please find the papers that we had discussed during the meeting.

Among them, Johnson, Woodruff, Lam, Koustas, and Lam are the 4 Navigation guide-based papers on birth weights, Verner, Morken, and Vesterinen are the other 3 that Geary summarized together in addition to the Navigation guide papers.

Chang (2008), Sundstrom, Olsen, and Chang (2012) are the comparative PKs in rodents, monkeys, and/or humans for PFBA, PFHxS, PFBS, and PFOS, respectively.

Hope this helps; and as always, please don't hesitate to let us know if there are any questions.

Thanks.

Sue

Dear Sue:

The presentations from you and Geary were both helpful and very timely. You said that you would share a couple of the recent publications with us so I hope that you will be able to do that, especially the one on glomerular filtration rate. I know I saw some on that topic in the most recent literature search from our library but since I have not yet asked them to retrieve anything for me I am not sure they are the same citations as those mentioned by Geary.

Chris Lau was sorry that he had to miss the presentations. It was a combination of the conference number I gave him not working and being called away on a laboratory item. I told him I would share anything you sent to me with him.

Our thanks to all of you for taking the time to visit us and share the results of your recent monkey PFOS study. On Friday, I read a couple of 3M PFOA papers that I had not read for a while. I was one more impressed with the thorough, clear reporting of the data. in both papers and your presentation.

Joyce

Joyce.

Dear Joyce,

Attached in this note please find the presentation file for the Oct 28, 2015 meeting. Again, many thanks for coordinating this - we really appreciate the opportunity. Should there be any questions for either myself or Geary, please don't hesitate to let us know!

Best,

Sue
